A. Landing and take-off fees

A landing and take-off fee has to be paid to the airport company by airlines and aircraft operating agencies for every landing and every take-off of their aircraft at Cologne Bonn Airport.

- [1] The landing and take-off fee is based on the maximum take-off mass* of the aircraft as entered in its certificate of airworthiness, whereby for landings or take-offs between 10:00 pm and 6:00 am (local time) a weight of 12,000 kg is taken as the lower limit (fixed fee), regardless of the actual maximum take-off mass.

A reduction of the MTOM in accordance with the airplane flight manual (AFM) will only be recognized if the FKB** is informed at least 4 months before the beginning of a new schedule period. Appropriate certification from the German Luftfahrt Bundesamt (Federal Aviation Office) or other competent airworthiness registration authority must be submitted as proof. Every increase of the MTOM of an aircraft in its registration papers has to be communicated immediately to the airport operator.

Cargo-only aircrafts are granted a reduction of 25 % of the fixed landing and take-off fee from Mondays to Fridays if both take-off and landing are between 6:00 am and 10:00 pm local time.

- [2] There is an incentive program (growth and volume incentive) for flights during daytime (6:00 am and 10:00 pm) that will normally be paid in the first quarter of the following year.

In addition the following fees have to be paid:

- [3] an emission charge per landing
[4] a noise charge depending on the noise category of an aircraft (1 to 11) per landing and per take-off
[5] a variable fee according to the number of passengers on board the aircraft when it lands

* Proof of the applicable MTOM as documented in the airplane flight manual (AFM)-Basic Manual-Section for weight limitations or in other electronic and/or written media accepted by the regulatory agencies of the state must be provided. Until presentation, the landing fee will be based on the highest MTOM of the respective type. No refunds will be granted.

** Flughafen Köln/Bonn GmbH (Cologne Bonn Airport Company)

I. Airport charges subject to authorisation

Airport Fees § 19b [1] LuftVG

[1] Landing and take-off fee

The part of the landing and take-off fee based on the maximum take-off mass of the aircraft, taking into consideration the terms of ICAO (Noise Protection Requirements for Aircraft, publication of the Federal Aviation Authority of 1 January 1991), is calculated as follows and amounts to:

Aircraft up to 2 t MTOM (emission charge included)

For propeller aircraft and helicopters per landing and per take-off				
up to 1.2 t maximum take-off mass		over 1.2 to 2 t maximum take-off mass		up to 2 t
complying with the conditions of ICAO Appx. 16, Vol. 1, Chap. 6 [-4dB(A)**], Chap. 8, Chap. 10 or the LSL Chap. VI.2.4., Chap. VIII, Chap. X*)	complying with the conditions of ICAO, Appx. 16, Vol. 1, Chap. 6 or the LSL, Chap. VI.2.3*)	complying with the conditions of ICAO Appx. 16, Vol. 1, Chap. 6 [-4dB(A)**], Chap. 8, Chap. 10 or the LSL Chap. VI.2.4., Chap. VIII, Chap. X*)	complying with the conditions of ICAO, Appx. 16, Vol. 1, Chap. 6 or the LSL, Chap. VI.2.3*)	without noise certificate according to ICAO Appx. 16, Vol.1 or the LSL
2,75 €	9,75 €	8,25 €	21,25 €	37,50 €

* Aircraft will comply with the conditions of ICAO Appendix 16, Vol. 1, Chapter 6, 8, 10 or the LSL if it is proved in individual cases by data of the manufacturer or comparable documents of a licensing authority that the noise values permitted by Chapter 6, 8 and 10 as well as the LSL are not exceeded.

Decisive for the calculation of the fees is the presentation of a corresponding noise certificate (issued by the aviation authority of the country in which the aircraft is registered) by the aircraft operator before take-off. If no such presentation is made, the landing and take-off fees will be calculated on the basis of the highest level of the respective type.

** Noise levels must be at least 4 dB (A) below the value limits of ICAO Appendix 16, Vol. 1, Chapter 6.

I. Airport charges subject to authorisation

Airport Fees § 19b (1) LuftVG

Final landing and take-off fee based on MTOM

Determining the final price per aircraft¹⁾

$(\text{Basic rate}_{\text{landing}} + (\text{Degression rate}_{\text{landing}} \times (400 - \text{MTOM}^*)) \times \text{MTOM}^*$

$(\text{Basic rate}_{\text{take-off}} + (\text{Degression rate}_{\text{take-off}} \times (400 - \text{MTOM}^*)) \times \text{MTOM}^*$

¹⁾ fee rounded; the price for aircraft over 400 to. MTOM is determined by basic-rate only

^{*}) per ton MTOM or part thereof (rounded up to the next ton)

- *)** Turbo-jet aircraft will comply with the conditions of ICAO Appendix 16, Vol. 1, Chapters 2 and 3 if it is proved by data of the manufacturer or documents of a licensing authority in individual cases that noise values permitted by Chapter 2 and 3 are not exceeded.

Aircraft comply with the conditions of ICAO Appendix 16, Vol. 1, Chapters 6, 8, 10 or the LSL if it is proved in individual cases by data of the manufacture or comparable documents of a licensing authority that the noise values permitted by Chapters 6, 8 and 10 as well as the LSL are not exceeded.

Decisive for the calculation of the fees is the presentation of a corresponding noise certificate (issued by the aviation authority of the country in which the aircraft is registered) by the aircraft operator before take-off. If no such presentation is made, the landing and take-off fees will be calculated on the basis of the highest level of the respective type.

- **)** Noise levels must be at least 4 dB (A) below the value limits of ICAO Appendix 16, Vol. 1, Chapter 6.

Bonus list

Aircraft according to bonus list BMDV: all aircraft types up to 25 t MTOM as well as

A 300	B 737-300 to -900	F 70
A 310	B 747-400/-800	Gulfstream IV and V
A 318	B 757	BAe 146/Avro RJ-Serie
A 319	B 767	DC 10-30/MD 11
A 320	B 777	DC 8-70
A 321	B 787	TU 204
A 330	CL 90	EM 170/175
A 340	CRJ 700	ERJ 190/195
A 380	CS1/CS3	IL-76TD90, IL-96
B 717	Dash 8-400	MD 90
B 727-100 (reengined with 3 Tray-engines)	F100	AN 74

When it can be proven by a noise certificate that a jet airplane complies with the condition of ICAO Annex 16 chapter 4, the aircraft will be regarded as bonus list aircraft even if that type is not explicitly mentioned on the list of the Ministry of Transport of the year 2003.

Incentive of modern aircraft types (valid 01.01.2026 - 31.12.2028)

For operations utilizing the **Airbus Neo series** (A319 neo, A320 neo, A321 (LR) neo, A330 neo), the **Airbus A321 XLR**, the **Airbus A220 series** (A220-100, A220-300), the **Airbus A350 series** (A350-900, A350-1000), the **Boeing 737 Max series** (737-7, 737-8, 737-8-200, 737-9, 737-10), the **Boeing 787 series** (787-8, 787-9, 787-10) and the **Embraer E2 series** (E175-E2, E190-E2, 195-E2), a discount on the fixed landing and take-off charge (according [1] page 7) in the amount of 10% is granted if the following additional conditions are met:

- Operation during daytime (6 am to 10 pm)
- Operation in the validity period 01.01.2026 – 31.12.2028

Incentive electrically powered aircraft types

For operations utilizing exclusively electrically powered aircraft type (without combustion engine) to and from Cologne/Bonn, a discount on the fixed landing and take-off charge (according [1] page 7) in the amount of 90% is granted.

Winter incentive for additional day passengers (validity period 01.11.2025 - 31.03.2026)

- Each additional passenger ((arriving + departing passengers) /2) during the day (6:00 am – 10:00 pm) in the period 01.11.2024 to 31.03.2025 gets an incentive; basis for comparison is the previous period (01.11.2023 to 31.03.2024): **4,00 EUR**
- The settlement/payment will be made ex post after 31.03.2025. The additional incentive will not be credited to the incentive program (growth incentive and volume incentive, see below), but will be granted in addition. A disbursement is subject to the condition that the amount of the credit exceeds a minimum value of 5.000 EUR
- The airline (LVG) that is the primary bill recipient is eligible for funding. Eligible is all passenger air traffic except general aviation traffic (GAT).

Winter incentive for additional day passengers 2025/2026 (validity period 01.11.2026 - 31.03.2027)

- Each additional passenger ((arriving + departing passengers) /2) during the day (6:00 am – 10:00 pm) in the period 01.11.2026 to 31.03.2027 gets an incentive; basis for comparison is the previous period (01.11.2025 – 31.03.2026): **4,00 EUR**
- The settlement/payment will be made ex post after 31.03.2027 The additional incentive will not be credited to the incentive program (growth incentive and volume incentive, see below), but will be granted in addition. A disbursement is subject to the condition that the amount of the credit exceeds a minimum value of 5.000 EUR
- The airline (LVG) that is the primary bill recipient is eligible for funding. Eligible is all passenger air traffic except general aviation traffic (GAT).

Long haul incentive for additional day passengers (valid 01.01.2026 - 31.12.2028)

- Each additional passenger ((arriving + departing passengers) /2) during daytime (06:00 a.m. – 10:00 p.m.) at a long-haul destination is eligible; the basis for comparison is the previous period.
- Year 1: incentive for every additional long-haul-passenger ((arriving + departing passengers)/2) during daytime: **5,00 €**
- Year 2: incentive for every additional long-haul-passenger ((arriving + departing passengers)/2) during daytime: **4,00 €**
- Year 3: incentive for every additional long-haul-passenger ((arriving + departing passengers)/2) during daytime: **3,00 €**

Long-haul destinations are destinations that are not located in the following countries (excluding overseas territories):

Europe EU		Europe Non-EU		Outside Europe
Austria	Italy	Albania	Moldova	Algeria
Belgium	Latvia	Andorra	Monaco	Egypt
Bulgaria	Lithuania	Armenia	Montenegro	Iraq
Croatia	Luxembourg	Azerbaijan	North Macedonia	Israel
Cyprus	Malta	Belarus	Norway	Jordan
Czech Republic	Netherlands	Bosnia-Herzegovina	Russia	Lebanon
Denmark	Poland	Georgia	San Marino	Libya
Estonia	Portugal	Great Britain	Serbia	Morocco
Finland	Romania	Iceland	Switzerland	Syria
France	Slovakia	Kosovo	Turkey	Tunisia
Germany	Slovenia	Liechtenstein	Ukraine	
Greece	Spain			
Hungary	Sweden			
Ireland				

I. Airport charges subject to authorisation

Airport Fees § 19b (1) LuftVG

- Settlement takes place annually in form of a final statement at the end of the financial year (the refund will normally be paid in the first quarter of the following year). After the funding period ends, funding is credited to all eligible airlines to offset the fees incurred in the following period. A payment is subject to the condition that the amount of the credit exceeds a minimum value of 5.000 EUR and that the airline has paid all fees for the underlying funding period in full; unpaid ten-day periods will result in a proportionate corresponding reduction in funding.

[2] Incentive program

The incentive program aims to promote sustainable traffic growth, based on today's traffic volume. The incentive program is working only for daytime performance (6:00 am – 10:00 pm). Eligible are all airlines with the exception of general aviation (GAT).

There are two options for incentives:

- 1. Growth incentive**
- 2. Volume incentive**

Eligible for incentives is the airline.

Settlement takes place annually in form of a final statement at the end of the financial year (the refund will normally be paid in the first quarter of the following year). After the funding period ends, funding is credited to all eligible airlines to offset the fees incurred in the following period. A payment is subject to the condition that the amount of the credit exceeds a minimum value of 5.000 EUR and that the airline has paid all fees for the underlying funding period in full; unpaid ten-day periods will result in a proportionate corresponding reduction in funding.

If the airline receives grants because of a pre-existing and still ongoing scheme that correspond to payments under the incentive program, these will be credited against the incentive program.

[1] Growth incentive

There are only incentives for daytime performance (6:00 am – 10:00 pm). There is no distinction between continental flights and intercontinental flights or between passenger traffic and cargo traffic.

Incentives are only possible if the following conditions are fulfilled:

- a. An airline increases its total traffic volume during daytime, measured in traffic units $((\text{arriving traffic units} + \text{departing traffic units})/2)$, by more than 3,0 % compared to the previous year. One traffic unit equates to either one passenger or 100 kilogram cargo.
- b. In case of group companies, growth has to be at least more than 1% compared to the previous year.

I. Airport charges subject to authorisation

Airport Fees § 19b (1) LuftVG

Depending on the growth rate of the airline, the following amounts will be paid for every additional traffic unit $((\text{arriving traffic units} + \text{departing traffic units})/2)$ during daytime compared to the previous year:

- Year 1: incentive for every additional traffic unit $((\text{arriving traffic units} + \text{departing traffic units})/2)$ during daytime: **4,00 €**
- Year 2: incentive for every additional traffic unit $((\text{arriving traffic units} + \text{departing traffic units})/2)$ during daytime: **2,00 €**
- Year 3: incentive for every additional traffic unit $((\text{arriving traffic units} + \text{departing traffic units})/2)$ during daytime: **1,00 €**

[2] Volume incentive

There are only incentives for daytime performance (6:00 am – 10:00 pm). There is no distinction between continental flights and intercontinental flights or between passenger traffic and cargo traffic.

Incentives are only possible if the following conditions are fulfilled:

An airline generates at least 100 thousand traffic units $((\text{arriving traffic units} + \text{departing traffic units})/2)$ per annum during daytime performance. One traffic unit equates to either one passenger or 100 kilogram cargo. In case of group companies, each company is valued individual. An aggregation of traffic volumes of group companies is not possible.

(Valid from 01.01.2026) Depending on the traffic volume per annum of the airline, the following amounts will be paid per traffic unit:

- Traffic volume per annum \geq 100 thousand traffic units: Incentive per traffic unit $((\text{arriving traffic units} + \text{departing traffic units})/2)$: **1,00 €**
- Traffic volume per annum \geq 200 thousand traffic units: Incentive per traffic unit $((\text{arriving traffic units} + \text{departing traffic units})/2)$: **2,00 €**
- Traffic volume per annum \geq 500 thousand traffic units: Incentive per traffic unit $((\text{arriving traffic units} + \text{departing traffic units})/2)$: **3,00 €**
- Traffic volume per annum \geq 1.000 thousand traffic units: Incentive per traffic unit $((\text{arriving traffic units} + \text{departing traffic units})/2)$: **5,00 €**

I. Airport charges subject to authorisation

Airport Fees § 19b (1) LuftVG

[3] Emissions charge

The emission-related charge amounts to **3,00 €** per kg of nitrogen oxide equivalent (the emission value) within the standardized LTO cycle of an aircraft. The charge is invoiced per landing. The required data on engine and aircraft types are retrieved from a recognized airline fleet database.

The emission-related charge is calculated using the ERLIG 1 formula on the basis of the certified nitrogen oxide (NO_x) and hydrocarbon (HC) emission values per engine in the LTO-cycle pursuant to ICAO Annex 16 Volume II as follows:

Formula:

$$\text{NOx, aircraft [kg]} = (\text{Number of engines} \times \Sigma \text{Mode time [s]} \times \text{fuel consumption [kg/s]} \times \text{NOx -index [g/kg]}) / 1000$$

If HC LTO > 19.6 g/kN the NO_{x,aircraft} is multiplied by a factor a:

a = 1; if DpHC/Foo ≤ 19.6 g/kN
a = (DpHC/Foo) / 19.6 g/kN ; if DpHC/Foo > 19.6 g/kN with (amax = 4).
Nitrogen oxide equivalent per aircraft = a x NO_x per aircraft.

The emission value is taken into account up to the third decimal place. The emission values are calculated on the basis of the ICAO Aircraft Engine Emissions Database for turbo jet engines 2 as well as the FOI Swedish Defense Research Agency Database for propeller-driven engines 3.

If the emission databases contain no or conflicting entries for an engine type, the highest known emission value will be used, regardless of the various operational criteria.

If for an aircraft no or contradictory engine data are available, the highest known emission value of this aircraft type will be applied. If an engine type is not included in one of the databases available and the data for a standard engine type cannot be used, the engine type will be evaluated on the basis of DLR-study dated February 28, 2005.

If there are different UID versions of an engine type, this must be documented to the airport operator (e.g. maintenance records, fleet lists in the form of an Excel file). As long as this has not been done, the airport operator shall apply the highest

will base the calculation of the charges on the highest emission value known for the engine type. Excel lists need only be accepted by the airport operator if the information submitted appears plausible; the airport operator will provide a standardized form for this purpose. In any case, the airport operator reserves the right to request further evidence, such as maintenance records.

The airport operator must be notified without delay of any increase or reduction in the emission value of the aircraft as entered in the AFM or ICAO certificate or manufacturer's documentation. For aircraft movements for which increased emission values are subsequently determined, the airport operator is entitled to levy retroactive charges; reduced emission values will be taken into account without delay as soon as they are documented and verified. No refunds will be made.

I. Airport charges subject to authorisation

Airport Fees § 19b (1) LuftVG

Attention for aircraft from 2 t to 6 t MTOM:

A general emission charge of 2.00 € per landing will be calculated – regardless of engine.

I. Airport charges subject to authorisation

Airport Fees § 19b (1) LuftVG

Noise charge per category	Day	Night
	From 01.01.2026	From 01.01.2026
Aircraft of noise category 1:	10,00 €	44,00 €
Aircraft of noise category 2:	18,00 €	66,00 €
Aircraft of noise category 3:	33,00 €	92,00 €
Aircraft of noise category 4:	41,00 €	109,00 €
Aircraft of noise category 5:	49,00 €	153,00 €
Aircraft of noise category 6:	77,00 €	219,00 €
Aircraft of noise category 7:	116,00 €	394,00 €
Aircraft of noise category 8:	155,00 €	569,00 €
Aircraft of noise category 9:	193,00 €	809,00 €
Aircraft of noise category 10:	258,00 €	1.006,00 €
Aircraft of noise category 11:	322,00 €	1.291,00 €

The aircraft is classified according to the median maximum levels of the last 3 to 6 years measured at point 6 (Lohmar) during take-off. Aircrafts not specified here will be classified by the airport at its reasonable discretion according to their noise certificates until such time as sufficient measurements are available for Cologne Bonn Airport. The classification of the aircraft according to the eleven noise categories is verified once a year.

Aircraft of type A 319/320/321 get 10% discount on landing-noise charge if aircraft is retrofitted with vortex generators. The retrofit for each registration has to be communicated to Cologne Bonn Airport in a comprehensible form (confirmation of aircraft manufacture/maintenance).

[5] Variable part of landing fee (passenger-/mail-aircraft only)

The variable part of landing fee which is charged by the number of passengers on board amounts to **0.28 €** and is charged for every landing.

Miscellaneous

The part of the landing and take-off fees based on the maximum take-off mass of the aircraft is also payable for a **touch-and-go landing**.

Landing and take-off fees are not payable for **emergency landings** due to technical problems of the aircraft or due to actual use of violence or threatened use of violence unless the airport was the scheduled destination. Diversionary landings are not emergency landings.

B. Passenger fee

Additionally to the landing and take-off fees a passenger fee has to be paid which is based on the number of passengers aboard the aircraft when landing (transit and transfer passengers included). The fee per passenger is:

- a) providing the aircraft has started from an airport within the member states of the Schengen Agreement inclusive Cyprus and Ireland

From 01.01.2026	8,35 €
-----------------	--------

- b) providing the aircraft has started from an airport outside the member states of the Schengen Agreement

From 01.01.2026	10,05 €
-----------------	---------

Not included in the number of passengers aboard the aircraft when landing are children less than 2 years old that are not entitled to occupy a seat.

Passenger fee cap

If the load factor of an airline exceeds 80 % within one calendar year, a refund in the amount of **1.08 €** per passenger over the 80 % mark is granted. The load factor is calculated from the number of passengers divided by the number of offered seats. The refund will normally be paid in the first quarter of the following year.

A disbursement is subject to the condition that the amount of the credit exceeds a minimum value of 1.000 €.

C. Security charge

Additionally to the landing and take-off fees a security fee has to be paid which is based on the number of passengers or weight of freight/mail aboard the aircraft when starting.

The security charge amounts to **1,95 €** per departing passenger. The security charge amounts to **3,50 €** per 100 kg outbound freight/mail or parts thereof. This charge also applies to outbound freight/mail in passenger aircraft.

D. Position fee

MTOM*	Fee
From 01.01.2026	
< 2 t	27,00 €
< 6 t	78,00 €
< 10 t	113,70 €
< 15 t	139,00 €
< 25 t	221,00 €
< 40 t	311,00 €
< 50 t	357,00 €
< 60 t	489,00 €
< 100 t	559,00 €
< 125 t	743,00 €
< 170 t	912,00 €
< 200 t	998,00 €
< 250 t	1.253,00 €
< 300 t	1.424,00 €
< 425 t	1.663,00 €
≥ 425 t	1.930,00 €

MTOM*	Duration in h
< 25 t	01:00
< 100 t	01:30
< 140 t	02:00
< 200 t	02:30
< 300 t	03:00
< 425 t	04:00
≥ 425 t	05:00

The position fee will be charged for the use of a parking stand or handling position for the average handling duration (DUABF). Where the DUABF is exceeded, a parking fee according to E. of the current schedule of landing fees will be levied.

For General Aviation Traffic there is no position fee, if the block time is less than 10 minutes per procedure.

*per ton MTOM or part thereof (rounded up to the next ton)

E. Parking charge

Aircraft owners must pay the airport operator a fee for parking their aircraft on an airport slot.

The amount of this fee depends on the aircraft's approved MTOM (rounded up to the next higher tonne) and whether or not the average handling duration (DUABF) is exceeded.

The slot fee for a block time exceeding the average handling time for the aircraft category applicable is as below per hour or part thereof and per metric ton or part thereof MTOM at the times stated.

Aircraft Category*	DUABF
1 < 25 MTOM	01:00
2 < 100 MTOM	01:30
3 < 140 MTOM	02:00
4 < 200 MTOM	02:30
5 < 300 MTOM	03:00
6 < 425 MTOM	04:00
7 ≥ 425 MTOM	05:00

Fee	
	From 01.01.2026
per hour or part thereof and by MTOM*	0,30 €
Max. amount for 24 hours (per 24 hours or part thereof and by MTOM*)	2,25 €
From 12 hours, the minimum charge per 24 hours or part thereof is	57,00 €

If the parking time exceeds 24 hours, the more favorable combination of hourly and 24-hour rate will be charged.

For the parking of aircraft which is expected to exceed 30 days, a rental agreement between the aircraft operator and the airport company can be made before parking begins, subject to the aforementioned provisions for calculating the rental charge.

*per ton MTOM or part thereof (rounded up to the next ton)

F. Central Infrastructure Fee

MTOM*		Fee passenger flights	Fee cargo-/mail flights
		From 01.01.2026	From 01.01.2026
<	6 t	22,00 €	47,00 €
<	10 t	34,00 €	65,00 €
<	15 t	57,00 €	75,00 €
<	25 t	57,00 €	75,00 €
<	40 t	63,00 €	99,00 €
<	50 t	68,00 €	128,00 €
<	60 t	76,00 €	159,00 €
<	100 t	84,00 €	164,00 €
<	125 t	100,00 €	180,00 €
<	170 t	134,00 €	246,00 €
<	200 t	155,00 €	266,00 €
<	250 t	173,00 €	292,00 €
<	300 t	173,00 €	320,00 €
<	425 t	203,00 €	347,00 €
≥	425 t	238,00 €	377,00 €

For mixed traffic (passenger/cargo, ferry/cargo etc.) the infrastructure will be charged at equal moieties.

*per ton MTOM or part thereof (rounded up to the next ton)

G. Airships and hot-air balloons

An anchor mast fee and a landing or take-off fee must be paid for airships and hot-air balloons using the airport.

Airships

The anchor mast fee is charged for erecting such a mast and amounts to the following for every 24 hours or part thereof 135.00 €.

The calculation period begins when the mast is put up and ends when it is taken down. The fixed landing fee depends of the airship MTOM and is calculated as stated in Chapter 3 / Bonus List per 1,000 kg of MTOM or part thereof.

Hot air balloons

A lump sum of 12.50 € is charged for the take-off of a hot-air balloon.

H. General conditions, notes and validity

- [1] These charges are payable by the following entities as joint and several debtors:
- a) the airline operating the relevant flight under its airline code/flight number,
 - b) airlines as joint and several debtors operating the relevant flight under their airline code/flight number (code sharing),
 - c) the registered user of the aircraft,
 - d) the individual or legal entity who has been using the aircraft without being the registered user or owner, such as the charterer or lessee.
 - e) the individual entity who has been using the aircraft without being the registered user or owner, such as the charterer or lessee,
 - f) any other company that requests FKB to issue the invoice for the fees in its name or company name.
- [2] All fees are payable in Euro (€) before take-off. In special cases it may be paid later if prior arrangements have been made with the airport company. If no takeoff is made after 10 days, the claim is due at the latest after the end of a calendar quarter on the first working day of the following month.
- [3] All fees are remuneration in the sense of § 10 paragraph 1) of the turnover tax law. The fee-payer must therefore additionally pay the turnover tax.
- [4] In principle, passenger aircraft are charged according to the passenger flight tariffs. For ferry flights with passenger aircraft, however, where freight (e.g. belly freight) is transported, the aircraft is billed as a cargo aircraft. Baggage does not count as freight.
- [5] It should be noted that for General Aviation flights, a so-called "Terminal Charge" is levied by the Business Aviation Center Cologne GmbH (BACC), which operates the General Aviation Terminal (GAT) at the Cologne/Bonn site, in addition to the charges set out in this Schedule of Charges. More detailed information and a tariff overview can be found on the BACC website at <https://www.bac-cologne.com/>.
- [6] No landing, take-off, passenger, parking or position charges are payable for civil government aircraft up to 5.7 t MTOM operating on government missions towards Cologne Bonn Airport. The same applies to aircraft officially piloted by staff of a civil aviation authority of the Federal German Government or by the government of any of its states on official missions. Civil government aircraft are defined as aircraft owned by the Federal German Government or by the government of any of its states bearing a civil nationality/registration mark. This exemption shall only apply if an official aeronautical service certificate is submitted for each flight.
- [7] General terms of payment/Miscellaneous
- Flughafen Köln/Bonn GmbH is at all times entitled to demand from the obligor of the charges security for existing and/or future claims for airport charges. The security is deemed to be sufficient if it covers the charges that are expected to be paid by the obligor of the charges in accordance with these tariff regulations within one month. The security for performance can be provided in the form of a surety that is drawn up under German law by a credit institution authorized

I. Airport charges subject to authorisation

Airport Fees § 19b (1) LuftVG

to operate inland and that is written, non-revocable, indefinite, directly enforceable and otherwise fulfils the regulations of the FKB, or by prepayment of a deposit. Flughafen Köln/Bonn GmbH is also entitled to demand prepayments for the scheduled flight events.

Charges are levied periodically in intervals of 10 days. The invoices are payable within 14 days without deductions. Discounts are not granted.

If the debtor has granted FKB direct debit authorization for the collection of charges through SEPA direct debit, a shortened advance notice period (pre-notification) of 3 (three) days shall apply. If the relevant SEPA regulations change, FKB shall be entitled to determine a new advance notice period. In exceptional cases, e.g. IT problems, SEPA direct debit collections shall be conducted automatically on the next day without repeat announcement. The debtor guarantees cover of the account. Costs incurred due to dishonouring or reversal of the debit are borne by the debtor, as far as such dishonouring or reversal has not been caused by FKB. The debtor shall fully bear any costs charged by the payment service provider (bank) for cross-border payments. This also applies to charges incurred by cardbased payment transactions (credit cards etc.).

The right of the debtor to determine repayment is excluded. Every payment is carried out on the basis of the current account balance. If no current account exists, the repayment sequence follows the provisions of §§ 366 section 2, 367 section 1 of the German Civil Code (BGB).

Objections can only be considered within a period of four weeks as of the date of invoice. Setting off with contested claims or those that have not been determined with final effect is precluded.

We reserve the right to claim interest and default interest in the event of late payment.

[8] Place of jurisdiction/place of fulfilment/applicable law/language

The place of fulfilment of all obligations, in particular the payment obligations of the obligor of the charges is Cologne. The place of jurisdiction is Cologne; the FKB is, however, also entitled to enter claims against the obligor of the charges at a court where the obligor is located.

This agreement is exclusively subject to German law. In the event of dispute, the German version of these provisions shall have priority over the translation thereof into English.

Obligors of the charges, whose seat is located outside of Germany and with whom a lasting business relationship exists, are obligated to name an agent authorized to take receipt of service and located within the Federal republic of Germany. The same shall apply in the event that the obligor of the charges moves to a location outside of the Federal Republic of Germany after the business relationship has begun.

These tariffs are effective from 01.01.2026

The official wording is in German.

II. Airport charges not subject to authorisation

[01.] Infrastructure

1.1. Fees for PMR, Counter fee, CUTE fee

II. Airport charges not subject to authorisation

The following listed services will be performed on request as far as available and the conditions for service and delivery are met.

A legal claim to the rendering of these services does not exist unless there are contractual Obligations.

Performed services or made deliveries not included in this list will be charged separately. Minimum unit is charged for extra service as mentioned respectively. Partially used units will be charged as completely used units.

A separate charge for operators or drivers will apply unless the cost of service equipment and vehicles specifically includes the demand of staff.

Value added tax effective on the day of service of delivery will be charged separately unless an exemption in accordance with the purchase-tax-law has been granted. The invoice recipient is responsible for exemption from the VAT.

Amendments and supplements are excepted as well as errors and omissions.

The list of fees published in the internet is not always equal to the current version. In case of doubt please do not hesitate to contact us.

The official wording of the price-list is published in German.

II. Airport charges not subject to authorisation

[01.] Infrastructure

1.1. Fees for PMR, Counter fee, CUTE fee

A. Fee for persons with reduced mobility

To finance any support for disabled passengers and passengers with reduced mobility every airline has to pay a PRM-charge (passengers with reduced mobility) directly to the operator of the airport (Cologne Bonn Airport).

This PRM-charge amounts 1,05 Euro (net) per departing passenger; excluded are children who are less than 2 years old and are not entitled to occupy a seat on their own.

B. Counter fee

Code	Service	Unit	Fee
2837	use of counter	per embarking passenger	0,21 €
	use of counter	minimum fee	16,80 €

C. CUTE fee

Code	Service	Unit	Fee
2464	CUTE fee	per embarking passenger	0,18 €

Kickback-rule CUTE:

- Each airline with more than 5% share of the total CUTE volume receives, per started % point share exceeding 5%, 1% discount on the base fee.
- The total discount is limited to a maximum of 35%.
- Airlines that are expected to receive a discount may apply for a direct offset (revenue reduction instead of kickback).

In the following year, a peak settlement of the CUTE fee takes place, in which the excess cover is distributed in addition to the kickback, or the shortfall is subsequently claimed. A credit note/subsequent claim is issued for amounts > 1.000 EUR.

2.1. Ground Handling Services

Flughafen Köln-Bonn GmbH (FKB) provides ramp handling services according to the following catalogue of services (A), rates (B) and aircraft types (C):

A. Catalogue of Basic Services

For a single ground handling consisting of the arrival and the subsequent departure of the same aircraft, FKB shall provide the following services according to IATA Standard Ground Handling Agreement, Annex A (SGHA, Version 2018) and according to the current business terms for ground handling services (AVB-BVD, published under: <https://www.cologne-bonn-airport.com/en/b2b/contract-terms-fees/download-portal.html>)

Flights classified as General Aviation Traffic (GAT) are subject to separate prices. The basic handling services are defined in Part III.

Services marked as “additional charge” are not included in the basic package and will be charged separately according to the list of fees applicable to the due date the services are rendered. The list of fees is published under 2.2.

[I] Passenger flights

Annex A: Section	Annex A: Sub – Sections (basic package content)
1 Representation	1.1.2, 1.1.3, 1.1.4, 1.2.1, 1.2.2, 1.2.4
2 Passenger services	NIL
3 Ramp services	3.1.1. (a), 3.1.2, 3.1.4 (a) (at additional charge), (c) (at additional charge), 3.1.6 (at additional charge), 3.1.7, 3.2.1, 3.3.1, 3.3.2 (a,b), 3.4.1 (a,c) (1,2) (narrow-body: 45 minutes incl., wide-body: 90 minutes incl.), (4) (at additional charge), (5) (at additional charge), 3.6.1 (a,c) (1) (1 step included), 3.6.2 (a) (1) (on request at additional charge), 3.6.3 (a,c), 3.6.4 (a) (1,2), 3.6.5 (a,b) (1), 3.6.6 (a,b,c,d,f) , 3.6.7 (a), 3.7.1 (a) (1,2), (b) (1,2), 3.7.2 (a) (1,2) (only where GSE is positioned), 3.7.3, 3.8.1 (a) (1) (1 pushback included) (2) (at additional charge), 3.8.2, 3.11.1 (a) (1,2) (on request at additional charge), 3.12.1 (a) (1) (on request at additional charge).

7 Security	NIL

Special procedures of Cargo ramp services	
a) Export freight	Acceptance of freight collected in the storehouse of the airline, such as pallets prepared unit load such as pallets or containers, for loading onto the intended aircraft.
b) Transfer freight	Transport of freight to a specific aircraft, the sorting area or to the freight storehouse of the receiving carrier on the airport ground
c) Import freight	Delivery of the unloaded freight on freight vehicles or dollies with appropriate load units as pallets or containers, at the freight storehouse.

Adoption of adequate measures to protect pallets, containers and lashing materials from damage or loss while in safekeeping of FKB during ground operations.

Any damage or loss caused by FKB is reported immediately to the carrier. The safekeeping obligation of FKB ends by handing out/delivering the freight after the ground handling operations have been completed.

II. Airport charges not subject to authorisation

[02.] Ground Services

2.1. Ground Handling Services

[III] GAT flights

The basic services for GAT flights relate only to aircraft class 1. Aircraft classes 2-6 are handled in accordance with the defined basic package I and II and the corresponding charges from Part B are applied.

The basic package for GAT flights includes the following services:

- Acceptance of the flight with brake blocks and pylons
- Incl. 1 loader

B. Rates

Basic handling fee for basic package Ramp-Handling (according to Part A)

aircraft-class	fees per rotation passenger flights	fees per rotation cargo flights
1	660,00 €	1.450,00 €
2	1.090,00 €	2.170,00 €
3	1.880,00 €	3.040,00 €
4	2.690,00 €	3.900,00 €
5	3.780,00 €	4.770,00 €
6	4.930,00 €	6.070,00 €

Handling fee for the acceptance of GAT flights (in accordance with Part A, III)

aircraft-class	fees per rotation passenger flights	fees per rotation cargo flights
1	140,00 €	140,00 €

If the aircraft is not assigned to aircraft class 1, the basic handling fee (according to Part A, I and II) is charged for aircraft classes 2 to 6.

The appropriate classification concerning aircraft-type and kind of traffic according to Part C.

The aforementioned charges include the basic handling services listed under Part A. They will be charged on all working days, Sundays and holidays, where applicable, with the addition of the surcharges or discounts stated in this agreement.

II. Airport charges not subject to authorisation

[02.] Ground Services

2.1. Ground Handling Services

[1] Surcharge / Discount

Technical Stop without change of load	50% discount on basic flat rate
Surcharge Diverted Flights	30% surcharge on basic flat rate
One Leg Ferry	20% discount on basic flat rate
Splitted Handling The Loading Team is withdrawn and rescheduled at a later time	20% surcharge on basic flat rate
Night-time handling If more than 50% of the ground handling services take place between 20:00 and 06:00 local time.	30% surcharge on basic flat rate
Additional partial on- or offloading after termination of loading process (loading of luggage completed), but before termination of a/c turnaround, on request of the Carrier – for specific events, e.g. «no shows».	75% surcharge for passenger aircraft 100% surcharge for cargo and mail aircraft on basic flat rates
Repetition of entire handling process for off-loading and loading of bags/cargo.	100% surcharge for passenger aircraft 150% surcharge for cargo and mail aircraft on basic flat rates

[2] Cancellation / Delay

Cancellation of flights*	50% surcharge less 72 hours prior STA 100% surcharge less 48 hours prior STA on basic flat rate
Delay of flights	15% surcharge if 15 min < STA 15% surcharge if 15 min > STD 35% surcharge if 30 min > STD 75% surcharge if 60 min > STD on basic flat rate

*Timings of the slot coordinator shall apply: fraztxh@fluko.org.

II. Airport charges not subject to authorisation

[02.] Ground Services

2.1. Ground Handling Services

[3] Additional Services

Loading unusual goods (bulky and/or heavy luggage, bulky/measurement goods such as bicycles, surfboards, golf equipment, skis etc. and animals etc.) and the usage of special rooms which demand special effort of time, equipment and/or staff, will be invoiced separately as additional services according to the FKB Additional Services Price List (published under chapter 2.2) depending on the additional effort.

The term "additional services" also includes all those services not covered in the Basic Services List (part A). This includes preparatory services if the loading does not take place at Cologne/Bonn airport as planned and/or advised. Charges for additional services are invoiced on the basis of the currently valid List of Net Prices for Special Services.

[4] Value added tax

VAT will also be charged at the rate applicable on the day the goods and services were rendered.

D. Definitions

For better understanding, the technical terms used in this list are defined as follows:

Passenger	includes also all airline staff or passengers travelling with free tickets
Cargo	includes also the airlines service freight
Terminal buildings/Handling areas	are all buildings/areas used for aircraft ground handling at the airport
Load	is luggage, freight, mail and ballast
GAT	are flights in the General Aviation Traffic category

Errors and omissions excepted.

2.3. Aircraft De-Icing Fees

A. Aircraft de-icing fee

Code	Service/Equipment (Equipment incl. operator)	Specification	Unit	Fee
0813	De-icing operation	for aircrafts up to 25 t	per operation	995,70 €
0906	De-icing operation	for aircrafts up to 100 t	per operation	1.726,30 €
4462	De-icing operation	for aircrafts up to 200 t	per operation	2.798,60 €
5607	De-icing operation	for aircrafts up to 300 t	per operation	4.194,90 €
5608	De-icing operation	for aircrafts more than 300 t	per operation	5.008,00 €
1292	for an ordered and available de-icing operation with no service required, 25% of code 813, 906, 4462, 5607 or 5608 will apply.			
3961	Employee De-icing		per operation/ per 15 min.	42,30 €
5766	Packaging and shipping of ADF samples		je Vorgang	31,10 €
5767	Additional audit deicing for DAQCP members	excl. materials	per hour /employee	267,80 €
Materials				
1005	De-icing fluid plus disposal*	Safewing MP II	per Liter	3,72 €
1006	De-icing incl. disposal	Safewing MP II	per Liter	4,97 €
4827	De-icing fluid plus disposal*	Safewing MP I	per Liter	4,74 €
4830	De-icing fluid incl. disposal/cash price	Safewing MP I	per Liter	6,37 €
1007	Water for de-icing	Hot	per Liter	0,30 €

Value added tax effective on the day of service of delivery will be charged separately unless an exemption in accordance with the purchase-tax-law has been granted. The invoice recipient is responsible for exemption from the VAT.

- * Due to reasons of water protection the Cologne Bonn Airport is obligated to ensure a professional disposal of the effluent deicing fluid (Clariant-water-mixtures). The final disposal costs are not known before the start of the deicing season. The final disposal costs will be calculated and invoiced after the end of the deicing season. In the past years the apportionment amounted to an average of 0,60 € per liter deicing fluid.

3.3. Driving in the Security Area

1. Driving in the security area with a vehicle ID or daily permit User of company or private vehicles (without special equipment for ground handling)

[a] Tariff for vehicles from 2.8 tons of total weight and higher and vehicles which are registered as vehicles of rescue services or authorities

Code	Service/Equipment	Unit	Fee
White license, Green license			
5392	Annual validity of a Vehicle ID*	per vehicle ID	344,20 €
5447	Validity for only quarter IV of a Vehicle ID*	per vehicle ID	86,20 €
5393	Vehicle permit ("FES")**	per day	29,80 €
3111	Replacement for a Vehicle ID	per vehicle ID	21,30 €
3664	Loss of a Vehicle ID	per vehicle ID	51,90 €

[b] Tariff for vehicles under 2.8 tons of total weight (without 1. [a])

Code	Service/Equipment	Unit	Fee
Color: yellow white, green yellow			
5394	Annual validity of a Vehicle ID*	per vehicle ID	2.291,90 €
5448	Validity for only quarter IV of a Vehicle ID*	per vehicle ID	573,10 €
5395	Vehicle permit ("FES")**	per day	94,80 €
3111	Replacement for a Vehicle ID	per vehicle ID	21,30 €
3664	Loss of a Vehicle ID	per vehicle ID	51,90 €

*Vehicles are exempt from the vehicle licence fee,

a) for which the guarantor for the application is also payer of the security charge and

b) which carry air freight

** If the "FES" is demonstrably returned early, the charge will be made for the period from the day of collection to the day of return.

Proof of insurance for the permission to drive on the apron must be presented when applying for the vehicle permit.

In the case of the 'annual validity of a vehicle ID', the fee is due upon issue or extension of the validity of the vehicle license. There will be no refund in the event of non-use or early return.

Vehicle ID licenses will be blocked if payment is 14 days late. This also applies analogously to 'Validity for only quarter IV of a Vehicle ID'.

We reserve the right to amend and/or extend the list of fees at any time.

The VAT rate applicable on the day of authorisation will be charged additionally.

8.4. Visitor Center and Film and Photo

C. General

Press articles concerning the airport, current events reporting and news reports are free of charge.

All such activities solely intended for airline training purposes will be invoiced at 40% of the rates above.

All additional services such as provision of vehicles, loudspeakers, electric power, etc. are subject to separate invoicing in accordance with our current price list/s (SL list).

Photos for advertising purposes taken only for the Cologne/Bonn Airport Company are not subject to any charge. Exceptions from this procedure must be agreed in writing with the airport company.

This includes all fees for photo and/or film shooting undertaken by airlines and/or airport tenants for advertising purposes.

Value added tax effective on the day of service of delivery will be charged separately unless an exemption in accordance with the purchase-tax-law has been granted. The invoice recipient is responsible for exemption from the VAT.
